Bluetooth Module (*AST-BT10*)
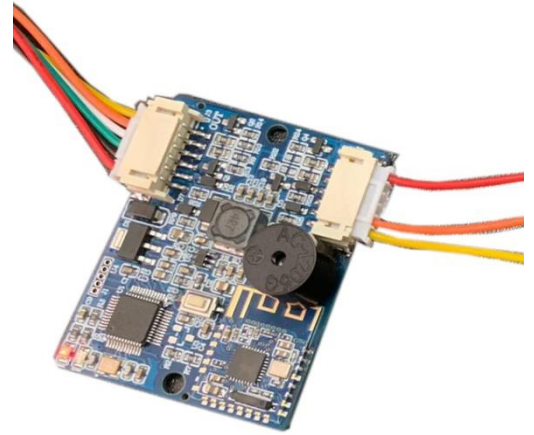

The Bluetooth Module is design for Mobile App connection, it supports AES128bit encryption for security channel communication. The device in build Wiegand Input for reader connection and Wiegand Output for standard access control system interface. The Bluetooth also allow program for drive two relays as a control device.

Features

- Built in Buzzer
- Support AES128 Bit Encryption
- Up to 30m Reading Range

Specifications

	AST-BT10
Card Interface	
Bluetooth	2.485G (Programmable 0.5m- 30m)
Support OS	Android and iOS
Response Time	1 s
Interface	
Communication	Wiegand 26-128 Bits with LED and Buzzer Control
General	
Power	12V / 100mA
Working Environment	-10℃ to 50℃ 10% to 90% RH
Dimensions	50mm x 40mm x20mm
