

iMS-Panel (**AST-P10X/P13X/P15X/P16X**)

iMS-Panel is an embedded device designed for Access Control, Lift Control, Car Park Control, Mailbox Control and Time Attendance System. The panel has a streamlined design that features the latest technology and a minimum of circuit boards to provide a highly dependable, cost-effective solution.

The panel is using embedded operation system to increase the security level and equipped with a true TCP/IP connection for real time monitoring and control. Through the TCP/IP connection, multinational corporations can easily control and monitor their worldwide spread offices via Internet.

Specifications

	Access Control (AST-P10X)	Lift Control (AST-P13X)	Car Park Control (AST-P15X)	Mailbox Control (AST-P16X)
Capacities				
User Record	100,000 User			
Transaction Record	100,000 Transaction			
Access Group	128 Access Group			
Time Zone/Time Code	128 Time Zone/ 128 Time Code			
Holiday	32 Holidays			
Car Park Group			1000 Parking Groups	
Support Interface Units	Up to 8 Interface Units	Supports 56 Floors	-	Up to 14 I/O Board
Communication				
Network Interface	100Mbps			
Serial Port	19200bps (8,n,1)			
485 Interface	9600bps (8,n,1)			
General				
Power	12V / 100mA			
Working Environment	-10°C to 50°C 10% to 90% RH			
Dimensions	105mm x 85mm x 25mm (H x W x D)
